

MegaRam™

The MegaRam™ is a full length 35 lbs. battering ram that is widely used today. The body length allows for the user to be away from the doorway for safer operation.

This ram has a proven track record over years of use and customer trials. The semi-flexible rubber handles are placed to optimize control and operator safety. They are a perfect blend of flexibility to cushion shock but are stiff enough for excellent control during use. The ram body is constructed of high impact strength UHMW composite results in years of trouble free use. Composite body and handles resist electrical contact. This ram is a perfect blend of durability, operator comfort and safety.

Length: 31 inches (78.7 cm)

Diameter: 4 ½ inches (11.4 cm)

Weight: 35 lbs. (16 Kg)
