

RatRam™

This compact Battering Ram is designed to maximize effectiveness and operator safety. The steel body and hardened impact plate are the backbone of this portable ram. The laser cut, rigid handles provide excellent control for precise strikes including elevated hinge strikes. The handles have been placed to maximize control and balance. With the center of mass directly below the front handle, missed hits or “skipping” off the target is greatly reduced. Heavy-duty front wrist guard is welded in place to protect operator.

Key features

- Fully welded construction - Made in USA.
- Balanced design to maximize impact force and control
- Heavy duty wrist guard welded in place
- Squared off bottom so ram stands straight ready for use

Options

- Optional composite impact disc can be temporarily installed on the front of the ram for use with steel training doors
- Carry sling can be quickly fastened to ram

Part Number	Overall Length	Head Width	Weight
BR23	20.25"	4.5"	23 lbs
